SUMMARY

Analytical professional with nearly two decades of experience evaluating complex fact patterns, regulatory obligations, and risk exposure in high-stakes environments. Extensive background in research, written analysis, investigative work, and advising senior decision-makers. Former manager and program lead with experience coordinating cross-functional teams, preparing executive-level briefings, and ensuring compliance with legal and regulatory frameworks. Currently pursuing a Juris Doctor and seeking a 1L position where rigorous analysis, writing, and sound judgment are essential.

EXPERIENCE

MassMutual — Threat Intelligence Manager

Hybrid | September 2024 – Present

- Analyze complex technical and factual records to assess organizational risk and legal exposure, translating findings into clear written and oral recommendations for executive leadership.
- Prepare structured assessments to support decision-making under regulatory, contractual, and operational constraints.
- Advise senior stakeholders on risk prioritization and remediation strategies with enterprise-wide implications.

Qualys, Inc. — Lead Threat Intelligence Analyst

Remote | January 2021 – June 2024

- Led and supervised a specialized research unit, directing investigative efforts into sophisticated threat activity affecting global organizations.
- Conducted in-depth analytical research and authored formal written reports assessing emerging risks, trends, and vulnerabilities, often relied upon by executives and external partners.
- Coordinated publication of the company's annual threat report, managing timelines, contributors, and external contractors while ensuring analytical rigor and clarity.
- Collaborated cross-functionally with legal, marketing, engineering, and executive leadership to translate complex findings into accessible narratives for public and internal audiences.
- Contributed to nationally recognized publications addressing cybersecurity risk, policy implications, and best practices, demonstrating advanced written communication skills.
- Evaluated compliance and risk implications associated with security disclosures and vulnerability reporting.

FLIR Systems — Vulnerability Manager

North Billerica, MA | December 2018 – January 2021

- Evaluated organizational compliance with federal and industry standards, including NIST 800-53 and CMMC, identifying gaps and recommending corrective actions.
- Assessed risk and impact associated with vulnerabilities, supporting reasoned decision-making under operational and regulatory constraints.
- Developed, tested, and audited internal controls to ensure consistency with documented policies and compliance obligations.
- Coordinated remediation efforts across technical and non-technical stakeholders, balancing risk, feasibility, and business impact.
- Prepared documentation and reports supporting compliance, audit readiness, and executive oversight.

City of Seattle — Security Consultant (1099 Contract)

Seattle, WA | July 2018 – September 2018

- Conducted independent application security reviews to assess compliance with municipal policies and standards.
- Produced written findings and recommendations supporting policy adherence and risk mitigation.

Microsoft Corporation — Security Program Manager / Threat Analyst

Redmond, WA | April 2015 – March 2018

- Conducted complex investigations into advanced and targeted threat activity, synthesizing large volumes of technical and contextual information into actionable intelligence.
- Prepared detailed written analyses and briefings for internal stakeholders and, where appropriate, external partners.
- Served as a liaison between Microsoft and federal law enforcement, supporting investigations involving cyber-enabled criminal activity.
- Managed a substantial case portfolio, coordinating with engineers, program managers, researchers, and leadership to meet procedural and timing requirements.
- Oversaw vulnerability disclosure and remediation processes, ensuring accurate documentation, verification, and resolution consistent with internal policies and external expectations.

Nike Inc. — Cyber Security Analyst

Beaverton, OR | December 2014 – April 2015

Details available by request

Parsons — Senior Network Analyst / Developer

Columbia, MD | November 2012 – November 2014

- Conducted detailed analysis of operational and network data to identify anomalies, assess risk, and support investigative conclusions.
- Designed analytical tools and scoring methodologies to improve consistency and objectivity in threat assessment.
- Authored internal documentation and reports supporting analytic findings and operational decision-making.

Tailored Access LLC — Cyber Analyst / Network Security Engineer

Fort Meade, MD | March 2012 – November 2012

Details available upon request.

United States Air Force — Cyber Intelligence Analyst

January 2007 – March 2012

- Performed analytical research supporting national security missions, including the evaluation of intrusion activity and emerging threats.
- Developed methodologies to reduce false positives and improve accuracy in detection and reporting.
- Produced written intelligence products and briefings for leadership and operational stakeholders.
- Led training and mentored peers, ensuring analytical consistency and adherence to established procedures.

EDUCATION

- Bachelor of Arts in General Studies, Southern New Hampshire University, Graduated September 2021
- Master of Business Administration, University of New Hampshire, Graduated May 2025
- Juris Doctorate, New England Law | Boston, Expected Graduation May 2028
